DETAILED ACTION

Applicant's Response dated May 10, 2003

1. The examiner would like to thank applicant's representative for pointing out the error in regards to the pending claims in the instant application. As pointed out in Applicant's Response, claims 26-30, 32, 33, and 35 were canceled and claims 49-50 were added in the Amendment dated October 1, 2002. Claims 31, 34, and 36-50 are pending.

2. Applicant's arguments have been carefully considered and have been found to be convincing. Thus the restriction requirement set forth in the Office Action dated April 18, 2003 has been withdrawn. The examiner will not address applicant's arguments at this time, as a new restriction requirement is set forth herein below.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups 1-110, claim(s) 31, 34, and 36-50, drawn to a synthetic oligonucleotide of at least 26 nucleotides in length comprising a 5mCpG dinucleotide and a

Art Unit: 1623

nucleotide sequence selected from the group consisting of TGACGTCA and SEQ ID NOS: 1-4 and 6-110.

The inventions listed as Groups 1-110 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: PCT Rule 13.2 requires that unity of invention exists only when the shared same or corresponding technical feature is a contribution over the prior art. The inventions listed as Groups 1-110 do not relate to a single general inventive concept because they lack the same or corresponding special technical feature. The "special technical feature" of Group I is a 5mCpG dinucleotide, wherein 5mC is a C-5 methylcytosine, which is shown by Volpe et al. FEBS Letters (1991), vol. 329, pages 233-237 (Volpe), to lack novelty or inventive step (see page 233, second column) and does not make a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
